Response to Amendment

1. The amendment filed on October 22, 2004 regarding claims 26-29, 31-32 and 43-44 has been fully considered but are not deemed to be persuasive.

- Claims 1-29 and 31-44 are presented for examination.

Allowable Subject Matter

2. Claims 1-25 and 33-42 are allowed.

Response to Arguments

3. In response to Applicant's arguments in page 18, that "Cloutier fails to disclose or suggest that a user generates a notification request." Examiner contends that Cloutier teaches notifying high priority messages to subscribers who subscribe to an alerting message service according to a defined set of criteria col. 2, lines 18-41 and col. 3, lines 21-41. Therefore, subscriber generate a notification request so that they can be notified when there is a high priority message according to their wishes and desires col. 5, lines 49-60.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

4. Claims 26-29, 31-32 and 43-44 are rejected under 35 U.S.C. 102(e) as being anticipated by Cloutier et al US (6,535,586).

Art Unit: 2153

As per claim 26, Cloutier et al teach a method for sending a message to a subscriber by a requesting user (fig. 1), the method comprising:

(a) generating a notification request by the requesting user at a source notifying high priority messages to subscribers who subscribe to an alerting message service according to a defined set of criteria col. 2, lines 18-41; col. 3, lines 21-41 and col. 5, lines 49-60];

(b) sending the notification request directly from the source to the notification server [Fig. 1. Col. 3, lines 20-41];

(c) selecting a notification mechanism for notifying the subscriber by the notification server [col. 3, lines 57 to col. 4, line 38]; and

(e) sending the notification to the subscriber through the notification mechanism by the notification server, wherein a notification mechanism for notifying the subscriber is determined independently of the manner in which the request user provides notification request message [messages are provided to subscribers via pagers, computers, PCS devices with SMS message, etc Col. 2, lines 30-49. See also col. 6, lines 36-61].

As per claim 27, Cloutier et al teach the method of claim 26, wherein (c) further comprises the step of determining a

communication mode for notifying the subscriber [Col. 2, lines 30-41 and col. 6, lines 36-61].

As per claim 28, Cloutier et al teach determining a time for notifying the subscriber [Col. 5, lines 40-52].

As per claim 31, Cloutier et al teach the method of claim 26, wherein the selection of the notification mechanism is based on a preference of the subscriber [Col. 5, lines 40-52 and col. 6, lines 36-61].

As per claim 32, Cloutier et al teach the method of claim 26, wherein the selection of the notification mechanism is based capability of a receiving device associated with the subscriber [Col. 5, lines 24-60].

As per claim 43, Cloutier et al teaches wherein the notification request is input at the source by the requesting user via a web page [col. 7, lines 17 to col. 8, line 11].

As per claims 44, Nielsen teaches the method of claim 43, wherein said web page is provided to the source by the notification server [col. 7, lines 17 to col. 8, line 11].

Conclusion

5. **ACTION IS MADE FINAL.** See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

The prior made of record and not relied upon is considered pertinent to applicant's disclosure.
